▼ Jeanethe Falvey---06/25/2010 10:13:11 AM---Hi Dave, I'm forwarding Charis's question on the funding, hope last night went well - so sorry I cou

Charis,

Thanks for covering last night's meeting. To answer your questions:

1. All of the settlement proceeds that were for remedial costs (as opposed to settlement proceeds that went to natural resource damages (NRD)) were applied to the harbor cleanup. Those proceeds were originally approximately \$75 million. Those proceeds earned approximately \$34.7 million in interest, so the total amount of funds from the settlement that went for remediation (again, not NRD) was app. \$109.7m (\$75m + \$34.7m).
2. Beyond the settlement funds, the funding has come from annual appropriations from EPA's national Superfund budget. These annual appropriations were supplemented in 2009 with \$30 million in stimulus funds.
3. You had also asked last night about the size of our Sawyer St compound. In total its approximately 9 acres. Eventually, now that we've moved our office to the renovated hot spot water treatment plant, and once the sediment stored in cell #1 is removed and the abutting shoreline pilot CDF is capped, we would only need approximately 4 acres of this area for the desanding plant, our offices and staff parking.
4. The draft ESD is posted at the harbor cleanup web site under "Technical Documents". Short cut to the URL is <http://epa.gov/ne/nbh/pdfs/466850.pdf>
5. Last night's presentation is not yet posted, should be up some time next week, But many of the same slides were in the Jan 2010 presentation, which is up on the web (under "Presentations").

Any other questions let me know!

Dave

Hi Jeanethe,

Just remembered: I also wanted to follow up to see if it was possible to get a number for the money that's been spent on the clean-up to date?

Also, I wanted to be sure I was clear on how the clean-up has been funded:

- There was a settlement in the early 90s under which federal/state governments recovered \$99.6mm – was all of this applied to the harbor cleanup?
- Beyond the \$99.6mm, where has the funding for the rest of the cleanup to date come from? Is the money coming from federal appropriations?

Thanks!

Cheers,
Charis
